CYLANCE CONSULTING

ThreatZERO™ + Compromise Assessment

Discover Critical Unknowns Lurking in Systems

Benefits

- Conclusively determine if there has been an existing, undetected compromise
- Learn if user credentials have been stolen or misused
- Identify any potentially unwanted programs that may have been used maliciously on your network
- Quickly identify and remediate any issues identified with actionable data for improvement
- Move networks into a state of prevention

In 68% of data breaches, victims didn't find out they had been breached for months or longer.

Source: 2018 Data Breach Investigations Report | Verizon

Many organizations assessing their security posture may be unaware of the overall state of their environment, that they have been breached, or that credentials are being misused. Cylance® Consulting can help these organizations conclusively determine if their network has been compromised.

ThreatZERO + Compromise Assessment was **designed to help organizations discover critical unknowns that may be lurking in systems**, waiting to be the source of a future compromise. Using artificial intelligence with proven methodologies, Cylance Consulting experts quickly determine if an environment has been the victim of a security breach and if sensitive data has been exfiltrated from your networks.

Service Overview

With ThreatZERO + Compromise Assessment, organizations will receive:

- AV Rip and Replace
- Operationalization of and CylancePROTECT® and CylanceOPTICS™
- Delivery and full review of the ThreatZERO HealthCheck Report
- Policy review showcasing best practices, suggested modifications, and further recommendations to establish prevention status
- Full malware status review during which threats are identified
- Full review of potentially unwanted programs (PUPs)
- Full review of memory exploit attempts and exclusions
- Full review of script control events and exclusions
- Thorough review of deployed agent version and update statuses
- Thorough review of new product features and upgrades

Additionally, the Compromise Assessment analyzes and addresses core problems such as:

- Data exfiltration and sabotage
- Command and control activities
- User account anomalies
- Malware and persistence mechanisms
- Network, host, and application configurations

Shortly after beginning the project, clients will be positioned into a preventative posture to prevent future threats and minimize the need to respond to incidents.

How confident are you in knowing whether or not your organization has been compromised? Contact Cylance Consulting or your technology provider about ThreatZERO + Compromise Assessment.
