Product End of Life Instructions

Smart-UPS Modular Ultra On-Line

Potential disassembly risks

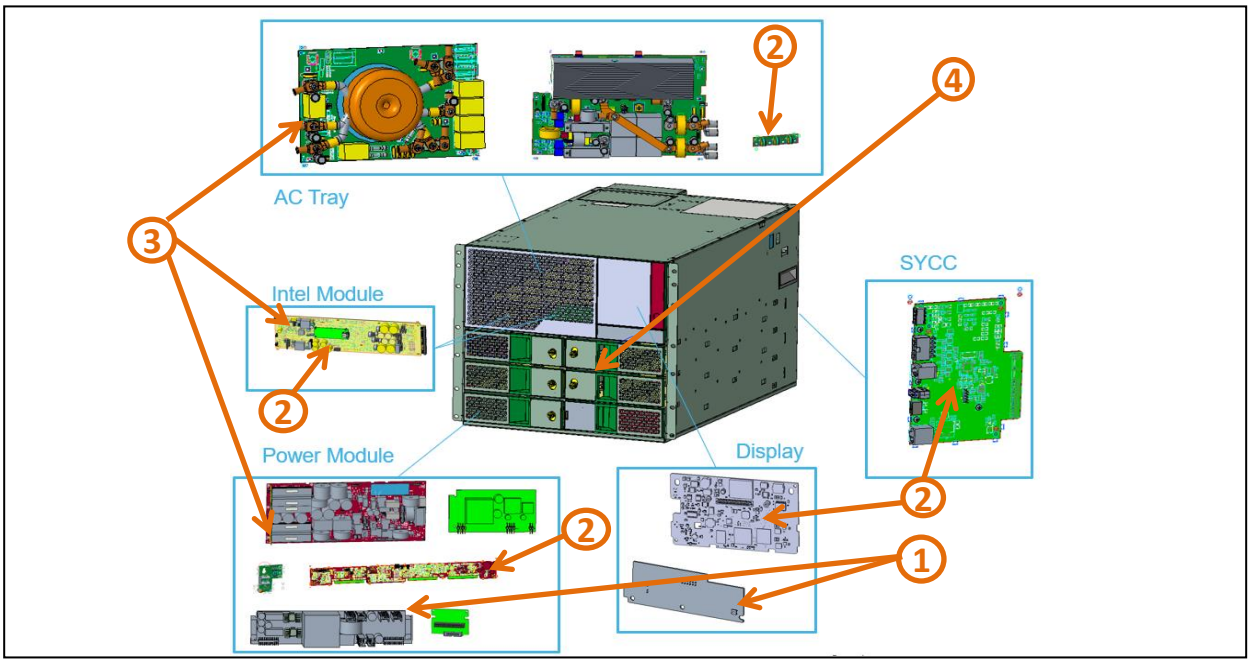
⚠ WARNING

HAZARD OF ARC FLASH OR FIRE

- Disconnect battery terminals before disassembly
- Avoid any electrical connection between the terminals

Failure to follow these instructions can result in death or serious injury.

End of Life Instructions



Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	ABS with brominates flame retardants	1083	Plastics with brominates flame
To be depolluted	2	Electronic Board (Communication) > 10cm²	4560	10 X PCBAs >10cm^2
To be depolluted	3	Electrolyte capacitors which size: height > 25 mm, diameter > 25 mm or proportionately similar volume	75	8 X Large electrolyte capacitors
To be depolluted	4	Batteries	30243	5 X Lithium-ion battery

* Not all capacitors and PCBAs are pictured here.

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	The main purpose of Smart-UPS Modular Ultra On-Line product range is to protect equipment and critical data from interruptions by supplying reliable, network-grade back up power reliably and efficiently. The product range provides this protection via ultra-high power density, On-Line power protection with Lithium-ion batteries in a modular, internally redundant-capable architecture.
Product reference	SRYL15K15RMXLT
Total representative product mass	112470 g
Representative product dimensions	390mm x 440mm x 700mm
Date of information release	2024/02/27

Additional information

Legal information	This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.	
Recyclability potential	**61%**	Recyclability rate has been calculated based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the “ECO’ DEEE recyclability and recoverability calculation method” was taken. If no data was found a conservative assumption was used (0% recyclability).
