FortiVoice™ Gateways

The FortiVoice Gateway works in conjunction with your FortiVoice phone system to expand the resources and connect different line types to the system. The gateways are supported on the FortiVoice Enterprise systems, FVE-100E and larger.

The FortiVoice Gateway solution provides ease of support for additional phone lines or analog extensions. The compact design and simple configuration makes growing your network a snap, and with the stackable design you can add as many gateways as you need now or later on as you grow. Gateways can be installed locally or remotely to provide scalable solutions for on-premises networks or centralized deployments.

Product Offerings

FVG-GO08, FVG-GS16, FVG-GT01 and FVG-GT02

Key Features and Benefits

Compact Design	The compact design of the gateways allows additional devices to be connected on the network.
Dual LANs	With dual network connections, it ensures devices will always be available even if a network connection goes down.
Easy Connections	Using standard RJ-11 connections makes it easy to plug lines or cables.
Ease of Configuration	Simplified and centralized configuration through FortiVoice web management.
Secure Audio	With SRTP, all calls are encrypted for maximum security.
PRI (T1/E1)	Supports both PRI T1, PRI E1 and R2 protocols in both single and dual port configurations.
FXO	Supports standard incoming PSTN lines incorporating regional and country dial plans.
FXS	Supports standard analog phones or fax machines allowing you to use your current hardware with newer technology.
Caller ID	Supports Bellcore, ETSI and DTMF Caller ID formats.
Fax / T.38	Supports T.38 for faxing over IP.
