FortiGuard[®] Analysis & Management Services

Datasheet

Hosted Central Management Solutions for FortiGate Systems

Centralized security reporting, logging, and configuration management are critical components of a large enterprise's security best practices. To enable smaller organizations to benefit from these capabilities, which are typically priced out of reach of smaller organizations, Fortinet offers the FortiGuard Analysis and Management Service. By delivering the solutions via a hosted service model, businesses of all sizes using FortiGate® platforms can have a robust, fault tolerant security reporting, log management, and centralized management solution. There are no additional requirements for hardware, software or facilities-providing a low cost of entry for smaller organizations.

Analysis Features

Top Viruses by Destination	•	On-Demand Service	Securely access the service from any Internet connected web browser.
	ŀ	Reporting	Ability to instantly view your risk posture, network performance and availability of applications with an easy to use interface. Reports can be generated and selected with an online calendar picker widget.

Rapidly Deployed FortiGuard Hosted Solutions

The FortiGuard Analysis and Management Service is delivered in the same way as other FortiGuard Subscription Services. The service is easily configured from the FortiGate device, authorized by the FortiGuard Center and in less than 10 minutes up and running. This allows for an ondemand approach to security log management, reporting, content archival, policy management, and configuration management. Securely access the service from anywhere there is an Internet connection via your favorite web browser. Maintain visibility of your overall risk posture, receive detailed information for troubleshooting purposes and have assurance that your business is running securely and smoothly.
