THE IDENTITY RESILIENCE CYCLE

Stop identity attacks. Limit damage. Recover fast.

90%+ of organizations suffered an identity related attack[1]

"Attackers aren't breaking in. They're logging in."[1]

IDENTIFY

Know your risk before attackers do

- Surface Entra ID misconfigurations
- Find excessive privileges
- Spot stale accounts

38% of breaches are from stolen credentials[2]

PROTECT

Shrink the attack surface

- Enforce least privilege access
- Validate device posture
- Deploy phishing resistant MFA

80%+ of compromises start on unmanaged devices[4]

DETECT

Catch what gets through

- Monitor authentication anomalies
- Flag MFA fatigue attacks
- Track impossible travel

217% YoY increase in MFA fatigue attacks[2]

RESPOND

Contain threats automatically

- Block suspicious sessions
- Force re authentication
- Suspend compromised accounts

$1.14M extra cost when detection takes >200 days[3]

RECOVER

Bounce back fast

- Restore Entra ID objects
- Recover configurations
- Resume operations

Recovery in **minutes,** not days — with proper backup and recovery

THE COST OF GETTING IT WRONG

$4.81M Average cost of a credential based breach[3]

22% Credential abuse is the #1 breach vector

2.9B Compromised credentials tracked in 2025

10x Password attacks surged from 3B to 30B/month

Identity attacks are inevitable. Impact doesn't have to be.
