

Barracuda Message Archiver

Message Archiving for VMware®

Delivered as a virtual appliance, you can deploy the Barracuda Message Archiver in VMware vSphere and vCloud Air—no extra hardware required. Barracuda Message Archiver is ideal for reducing email storage requirements and boosting user productivity with mobile or desktop access to any email ever sent or received. Barracuda Message Archiver provides a powerful, yet simple platform for eDiscovery and compliance.

- Security
- ☑ **Storage**
- Application Delivery
- ☑ **Productivity**

The Barracuda Advantage

- No per-user or per-server fees
- Mobile applications for anytime/anywhere access
- Outlook Add-in for combined mailbox and archive search
- Automated discovery and import of PSTs
- Attachment and whole message stubbing

Product Spotlight

- All-in-one, cloud-connected message archiving appliance
- Improves mobile user access and productivity
- Eliminates need for PSTs
- Reduces email storage costs
- Federated Search simplifies eDiscovery and compliance

Cloud-Connected Archiving

The cloud-connected Barracuda Message Archiver uses the Barracuda Cloud to move or copy data to the cloud. Setting policies in “mirror” mode replicates all data to the cloud for disaster recovery purposes. Setting the policy to “Rotate” mode allows the appliance to scale-up and use the cloud as a secondary tier of storage.

Simplify Email Management

Users treat mailboxes as filing cabinets, driving expensive server storage to expand continually. They respond to storage limits by archiving messages locally with PSTs, which are not managed (or even seen) by IT. The Barracuda Message Archiver dramatically reduces demand for email server storage through attachment stubbing, message/attachment deduplication, and compression, while also eliminating the need for PSTs.

Streamline eDiscovery and Compliance

The Barracuda Message Archiver’s indexed archive supports extensive search, auditing/permissions, legal hold, and export helping facilitate eDiscovery and retention. An intuitive interface and powerful feature set shortens response time to ensure messages are found easily when needed. Federated search lets users search across appliances and cloud-based data even when email services are unavailable.

Users can search and retrieve archived email anywhere, anytime.

I check the Message Archiver periodically to make sure there are no issues, but that's it... Searching is extremely easy and fast with the Barracuda Message Archiver.

Product Features

Archiving

- SMTP messages, Exchange calendar, tasks and contacts
- Network crawling for PST import
- Reports: volume, storage utilization, violations, usage
- Mirror and extend storage to the cloud
- Stack multiple appliances for increased storage and deployment flexibility

User Access

- Full-featured, robust mobile apps (iOS, Android)
- Outlook add-in
- Web interface
- Quickly restore messages with Resend to Me

Virtual Appliance

- Hardened OS

Integration

- Exchange journaling
- Import from Exchange (MAPI)
- Import via IMAP and POP3
- Export via PST or EML
- Export to Copy (www.copy.com)
- Cloud email services (Office 365, Google Apps) via Cloud Relay
- Integration with LDAP

Management

- Predefined roles
- Granular control for access and policy
- Domain-level auditor
- Standard and custom policies
 - Foul language
 - Personal email use
 - Personally identifiable information
- Violation alert digests
- Retention policies
- Legal hold

Message Search

- Full text search with multiple operators
- Metadata, contents, attachments
- Reusable saved search
- Tagging
- Federated search across appliances and cloud
- Reply to, forward and export messages

Efficiency

- Exchange stubbing
- Deduplication
- Compression
- PST consolidation

Support Options

Barracuda Energize Updates

- Standard technical support
- Policy definition updates
- Document definition updates
- Virus definition updates
- Security updates
