CISCO Meraki

MS150 AT-A-GLANCE

Future-proof your network with the Meraki MS150

A stackable access switch built to support Wi-Fi 7, IoT, and more.

Cisco Meraki™ MS150

(24/48 port models)

Power the edge with the Cisco Meraki MS150

Maximize performance

Support demanding applications with up to 5 GbE mGig options available
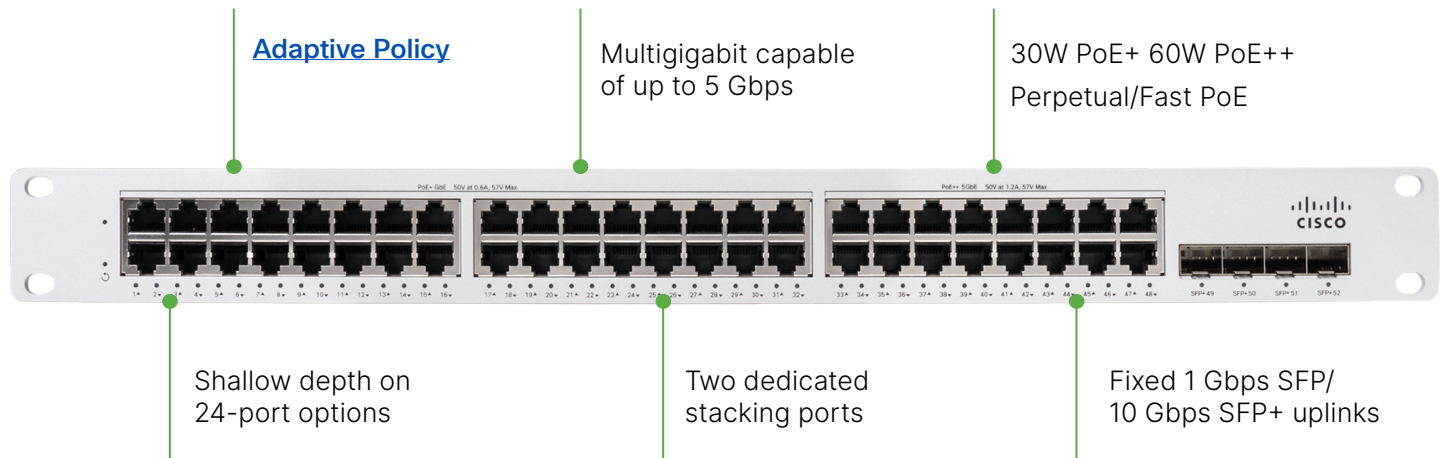

Future-proof your network

Adopt new generations of technology with up to 60W PoE++

Enable seamless scalability

Scale up to 8 stackable switches with 80 Gbps stacking bandwidth

CISCO Meraki

Meraki MS150 hardware highlights

Adaptive Policy

Multigigabit capable of up to 5 Gbps

30W PoE+ 60W PoE++ Perpetual/Fast PoE

Shallow depth on 24-port options

Two dedicated stacking ports

Fixed 1 Gbps SFP/ 10 Gbps SFP+ uplinks

Create future-proofed cloud networks with the new Meraki MS150

Support Wi-Fi 7 deployments

Future-proof your networks with 60W PoE++ to support demanding deployments of Wi-Fi 7 access points

Create smarter spaces

Connect and secure next-gen IoT devices to create smart spaces in the network closet and beyond

Zero-touch provisioning

Pre-provision hardware and deploy in bulk without any dedicated onsite IT staff required

Troubleshoot from miles away

Fastest Mean Time to Resolution (MTTR) with powerful tools like cable testing, cycle port, and more

Security without the headache

Provide an additional layer of security based on the intent of the user, device, and application

Intelligence at every layer

Automatic firmware upgrades, central visibility, and detailed telemetry data for every path
