Accurate Color with a Wide OLED Screen

Advanced Calibration functionality allows display to achieve reference performance for picture quality-enabled by LG's proprietary software (SuperSign for White Balance). It supports programmable hardware 1D & 3D LUTs and multiple color-accurate profiles for rapid transitioning between calibrated modes.

* Image shown is for illustrative purpose only.

Diverse I/O Interfaces

A variety of input interfaces are provided including HDMI, quad loop-thru SDI (BNC), IP (SFP+ & RJ45). Supported IP formats include ST-2110 and ST-2022-6. Also included interface is a Genlock input for use in broadcast and virtual production applications.

* Image shown is for illustrative purpose only.

Convenience and Functionality

The control panel provides shortcuts to frequently used functions and profiles featuring different monitor settings and picture quality options. Also, a variety of user selectable on-screen features are available such as Markers, Zoom, Audio Level Meters, and Waveform & Vector Scopes.
