Protect
G Suite with
Acronis Backup

The most reliable and easy-to-use backup for businesses of all sizes

IS YOUR G SUITE DATA BACKED UP?

Today G Suite is the go-to for more than 5 million businesses worldwide – but companies continue to lose the data they create and store there, jeopardizing their bottom line and their reputation. This outcome is the result of a widespread misconception that G Suite does not require backup. Unfortunately, there are a host of modern threats to data, like accidental or intentional data deletion, malicious actions, and even malware. So while Google ensures infrastructure resilience, data protection remains customers' responsibility. This means users require third party backup to avoid unrecoverable data loss within G Suite applications.

If your business relies on G Suite, you need Acronis Backup, the most reliable and easy-to-use backup for businesses of all sizes. With Acronis Backup you can leverage easy to use, efficient and secure cloud backup to protect G Suite data stored in Gmail, Drive, Contacts and Calendar from a wide range of threats. Acronis Backup ensures business continuity, enables quick access to data and helps businesses remain compliant.

WHY YOU NEED TO PROTECT YOUR G SUITE DATA

Accidental deletion

Malicious insiders

Malware and ransomware

Retention policy gaps

Compliance issues

Terminated accounts

Protect G Suite data from more threats

Defend you G Suite data from a wide range of threats such as accidental deletion, retention policy gaps, malicious insiders, malware, ransomware, and more.

Ensure business continuity and meet better RTOs

Reduce costly recovery times and ensure your business keeps running with fast, granular restore.

Ensure constant access to data, avoid downtime

Drill down through backups and download individual files, email attachments or other G Suite items in mere seconds, right from the backups.

Stay compliant and avoid penalties

Comply with legal or business requirements and avoid penalties of any kind – secure off-site cloud storage and unlimited data retention makes it easy.

KEY FEATURES FOR EFFICIENT G SUITE BACKUP

Easy to use web UI
Administer the solution and perform G suite backup tasks using a user-friendly, modern web interface. Reduce costs and time spent learning and implementing the solution.

Quick search
With metadata and full-text search capabilities you can quickly find and restore critical data, such as a departed employee's email or an old document needed to resolve legal issues.

End-to-end encryption
Be confident your data is protected. Acronis Backup uses TLS to protect data transferred over the network while data centers have high-grade, disk-level encryption and per-archive AES-256 encryption.

Auto-discovery of new G Suite items
It's possible to detect new G Suite users and Team Drives – automatically. Acronis Backup ensures easy administration by simplifying G Suite backup management.

Flexible granular restore
Recover missing emails, files, contacts and more – within seconds. You can preview email message content before recovery or download the required file right from the backup.

Support for Google MFA
Add an additional layer of security such as authentication via a trusted device or fingerprint. Acronis Backup supports Google multi-factor authentication (MFA).

Blockchain-based notarization for Drive `EXCLUSIVE`
Benefit from integrated Acronis Notary technology to get independent validation that backed up Drive files are unchanged. Acronis Notary creates a unique digital fingerprint for backups and stores it in a public ledger.

Transparent reporting and monitoring
Check on your G Suite backups or restore progress using the web-based dashboard, and receive status notifications by email. Acronis Backup ensures detailed information is at-the-ready.

BENEFIT FROM A CLOUD-TO-CLOUD G SUITE BACKUP SOLUTION

Save time spent deploying and maintaining your G Suite backups with an agentless, cloud-to-cloud solution. Acronis Backup lets you back up G Suite data directly from Google data centers to the highly secure Acronis Cloud Storage.
