Acronis
Cyber Protect Cloud

Modernize your clients' cybersecurity and backup with integrated cyber protection

PREVENT CLIENT DOWNTIME AND DATA LOSS WITH ESSENTIAL CYBER PROTECTION

Acronis Cyber Protect Cloud is the only solution that natively integrates cybersecurity, data protection, and management to protect endpoints, systems, and data. This synergy eliminates complexity, so service providers can protect clients better while keeping costs down.

STRENGTHEN YOUR SECURITY SERVICES AND IMPROVE PROFITABILITY

▶ Reduce risk

Secure all client workloads with next-generation cyber protection. Minimize your clients' security risks with integrated cyber protection covering 100% of their endpoints and unlock unique capabilities not available from your current security vendor. Rise to the challenge of 2021's cyberthreats and greatly reduce security incidents and breaches. Leverage the solution that's a leader in independent testing (VB100, AV Test, AV-Comparatives, ICSA Labs).

▶ Increase profitability

Boost your monthly recurring revenue. Strengthen your security services and unlock easy upsell and cross-sell opportunities built on one solution that includes cybersecurity, backup and recovery, file sync and share, and security management toolkit. Reduce churn by demonstrating your cyber protection results to clients via integrated reporting. Build client loyalty and trust with our pre-built education and marketing materials.

THE WORLD'S BEST BACKUP AND RECOVERY

Full-image and file-level backup and recovery safeguard workloads on more than 20 platforms – with near-zero RPOs and RTOs.

ENHANCED WITH ESSENTIAL CYBER PROTECTION AT NO ADDITIONAL COST

Advanced AI-based behavioral detection engine stops malware, ransomware, and zero-day attacks on client endpoints and systems.

WITH PROTECTION MANAGEMENT BUILT FOR MSPS

Enable thorough post-incident investigations and proper remediation, while keeping costs down by collecting digital evidence and storing it in a secure central repository.

▶ Lower costs

Cut cyber protection costs by up to 50%. Unlock cost savings by consolidating vendors instead of purchasing multiple point solutions from multiple vendors. Simplify management, improve workflow automation, and reduce the security risks caused by using a patchwork of tools. Harness the power of one with an integrated solution: one license, one agent, controlled and deployed through one intuitive console.

RECOGNIZED MEMBER OF THE CYBERSECURITY INDUSTRY

MVI member

VIRUSTOTAL member

M3AAWG member

Anti-Malware Testing Standart Organization

Cloud Security Alliance member

Anti-Phishing Working Group member

FIPS 140-2 certified cryptographic library

ISO 27001:2013 certified information management

EU-US and swiss-US Privacy Shield certified

Enables compliance	GLBA-compliant	HIPAA-compliant	GDPR-compliant

ENHANCE YOUR BACKUP SERVICE WITH ESSENTIAL CYBER PROTECTION AT NO COST

Gain a unique competitive advantage and increase your profitability with essential cyber protection functionalities that cover all endpoints.

▶ Cybersecurity

Stay ahead of modern cyberthreats with award-winning anti-malware enhanced with anti-ransomware capabilities focused on zero-day threats. Prevent data leaks via local channels.

▶ Backup and recovery

Minimize data loss across your clients' infrastructure and workloads with the best backup and recovery technology, available in consumption-based or per-workload licensing models.

▶ Management

Centralize your protection management and provision endpoints in minutes. Remotely assist clients and assess system vulnerabilities and security gaps. Increase visibility with built-in monitoring and reporting.

▶ Disaster recovery (DR)

Allow clients on DR-enabled tenants to establish secure connection to the corporate network with their personal devices, or test failover in an isolated network environment.

▶ File sync and share

Increase productivity by enabling your clients to create and securely share corporate content from anywhere, at any time, and on any device. Only get charged for the storage you use.

▶ Notary

Ensure the integrity of data, while achieving regulatory transparency and decreasing security risks with a blockchain-based service for file notarization, e-signing, and verification.

EXPAND YOUR SERVICES WITH ADVANCED PROTECTION PACKS

Add other powerful components to strengthen your services even further with advanced protection packs and unique cyber protection capabilities. Control your costs by paying only for the functionalities your clients need. Advanced packs include:

◗ Advanced Security

Replace inefficient, legacy antivirus with integrated cyber protection that includes full-stack anti-malware. Increase your detection rate and responsiveness to the latest cyberthreats. Extend cyber protection to web browsing, backed-up data, the recovery process, and exploit prevention. Enable investigations by capturing forensic data in backups.

> **Full stack anti-malware**
> **URL-filtering**
> **Exploit prevention**

◗ Advanced Management

Streamline vulnerability management and promptly close gaps in your clients' IT infrastructure through enhanced patch management. Gain visibility into your clients' software assets and data protection to ease daily tracking and planning tasks, and improve clients' uptime by monitoring disk drives health.

> **Patch management**
> **Fail-safe patching**
> **Disk drive health monitoring**

◗ Advanced Email Security ^{Powered by Perception Point}

Block email threat, including spam, phishing attacks, business email compromise (BEC), advanced persistent threats (APTs), and zero-day threats in seconds before it reaches end-users. Leverage Perception Point's next-generation technology for lightning-fast detection and easy deployment, configuration, and management.

> **Anti-phishing and anti-spoofing engines**
> **Anti-evasion technologies**
> **Next-generation dynamic detection against zero-day threats**

◗ Advanced Backup

Strengthen your data protection services by ensuring clients never lose data, even between scheduled backups. Extend backup capabilities to SAP HANA, Oracle DB, and application clusters. You can also gain visibility for the protection status of all data across your clients' infrastructure.

> **Continuous data protection**
> **Data protection map**
> **Scheduled backup reports**

◗ Advanced Disaster Recovery (DR)

Get clients back to business in mere minutes when disaster strikes by spinning up their systems in the Acronis Cloud and restoring them anywhere, ensuring immediate data availability. Make disaster recovery painless and increase efficiency with orchestration, runbooks, and automatic failover.

> **Production failover to the Acronis Cloud**
> **Disaster recovery orchestration**
> **Site-to-site VPN**

◗ Advanced File Sync and Share

Take full control over data location, management, and privacy with a superior file sync and share service that includes a transaction ledger to enable notarization and eSigning capabilities, and supports all platforms. Ensure data authenticity and reduce fraud by layering advanced features on top of the essential, pay-as-you-go service.

> **Remote file notarization**
> **Embedded eSiging**
> **Trusted, independent verification**

BUILT ON ACRONIS CYBER CLOUD

Acronis Cyber Protect Cloud is built on the powerful Acronis Cyber Cloud platform, enabling service providers to use one solution for delivering backup, disaster recovery, ransomware protection, file sync and share, and blockchain-based file notarization and e-signature services to clients. In turn, Acronis Cyber Protect Cloud provides MSPs with smooth and quick deployment, and a service-rich solution portfolio that increases ARPUs.
