Infrascale™

INFRASCALE CLOUD BACKUP

Protect all of your data. Never pay a ransom. Sleep easier at night.

Infrascale Cloud Backup is an enterprise-grade direct-to-cloud backup solution that protects servers, desktops, laptops, tablets, and smartphones, all in one solution.

Key Features & Benefits

Protect All of Your Data

With so many untethered laptops and mobile devices, IT is challenged with protecting distributed data. Infrascale Cloud Backup supports the most popular operating systems and protects servers, workstations, laptop fleets, and mobile devices.

ForeverSave Archive

Infrascale is a true archive and can be used to free up space on your local hard drives and meet your data retention mandates. Infrascale lets you choose your own data retention periods for certain versions and we'll auto-delete files from the archive once they hit their retention expiration.

Anomaly (Ransomware) Detection

Infrascale Cloud Backup includes Anomaly Detection that proactively notifies you when the changed file count surpasses a specified threshold. These early warnings can limit the amount the damage inflicted by ransomware while also pinpointing the time of infection.

Security & Encryption

We encrypt files with AES 256 bit encryption before being transferred over a secure SSL (AES 256 bit) to one of our top-tier data centers. We also encrypt your data at rest within our data centers. For added security and privacy, we offer UltrasafeMAX, an exclusive, double blind encryption method that gives you, and only you, access to decrypt data.

Trust in the Cloud

By backing up your information to the cloud you can easily access, manage, and recover your data from any device via our online web portal-- log in from any browser, even your tablet or smartphone.

Road Warriors & Branch Offices

For many IT organizations, protecting mobile devices and laptops for remote users and branch offices is a major headache. With Infrascale Cloud Backup, you can protect all of your data -- no matter where it resides.

How It Works

Mass Deployment

You can mass deploy backup agents to branch office laptops, desktops, and mobile devices. You can even integrate your deployment with Active Directory to automatically create accounts.

Setup Monitoring Alerts

Create alerts to show errors, warnings, successes, missed backups, anomalies, or any combination of these. Proactive alerts will save you time and ensure all of your organization's data and devices are protected.

Test a Recovery

With Infrascale Cloud Backup, you can recover files and folders, even entire images, in seconds. With unlimited testing, you can even run as many test recoveries as you'd like.

Supported Systems

Windows Win 7 and up
Windows Server 2008 (SP2) and up
Microsoft SQL Server 2008 and up
Microsoft Exchange Server 2010, 2013

Mac
OS X 10.8 and up

Linux
volumes supported by network-mapping to a PC or Mac

Android 2.2 and up
iOS 7.0 and up

Infrascale™

Founded in 2011, Infrascale provides comprehensive, cloud-based data protection by delivering industry leading backup and disaster recovery solutions. Combining intelligent software with the power of the cloud, Infrascale removes the barriers and complexity of secure, offsite data storage, and standby infrastructure for real time disaster recovery. Trusted and recommended by leading independent industry experts, Infrascale equips its customers with the confidence to handle the unexpected by providing greater availability, better security, and less downtime, when it comes to their data.
