

# FlashStation

# FS3017

Designed for lightning-fast computing environments, Synology FlashStation FS3017 is a highly reliable, cost-efficient, and ultra-high performance all-flash storage solution with comprehensive business applications for enterprise users. Synology FlashStation FS3017 simplifies data management and optimizes virtualization environments, with minimal time investment in setup and maintenance. Synology FS3017 is backed with Synology's 5-year limited warranty.

### **Astonishing Performance**

Powered by **two Intel Xeon E5-2620** six-core CPUs and **64GB DDR4 ECC RDIMM** (up to 512GB), Synology FS3017 delivers over **200,000 4K Random Write IOPS**<sup>1</sup>, making it ideal for video post-productions, mail server, virtualization and database applications, which require ultra-high performance and low latency.

FS3017 comes with **dual 10GBase-T** ports and supports optional **10GbE** / **25GbE** / **40GbE** network interface cards, allowing more flexibilities for network configurations. Network performance is further enhanced with **iSCSI over RDMA**<sup>2</sup> and **Non-Uniform Memory Access (NUMA)** integration.

# Cost Effective Unified Storage

Synology FS3017 is compatible to major SAS / SATA SSD brands to avoid vendor lock-in. FS3017 is also a unified storage server supporting iSCSI protocol and file sharing services, which provides the cost savings and simplicity of consolidating storage over an existing network while providing the flexibility required by virtual server environments. In addition to the internal 24 drive bays, FS3017 supports up to two Synology Expansion Unit RX2417sas<sup>4</sup> to provide a total of 72 2.5" drive bays for flexible storage management.

# Virtualization Ready

FS3017 provides seamless storage solutions for virtualization environments, including VMware, Citrix, Hyper-V, and OpenStack. With VMware vSphere 6 and VAAI integration certified, FS3017 helps offload specific storage operations and optimizes computing power for unparalleled performance and efficiency in VMware environments. Windows Offloaded Data Transfer (ODX) and Synology Advanced LUN support greatly improves the efficiency on massive data transfer and migration. With OpenStack support, FS3017 can be used as a block-based storage component for servers complying with the Cinder API.

## Highlights

- 200,000 4K Random Write IOPS¹, ultrahigh performance with low latency
- Dual Intel Xeon 6-core CPU and 64GB DDR4 ECC RDIMM, expandable up to 512GB
- Dual onboard 10GBase-T ports, capable of installing optional 10GbE / 25GbE / 40GbE NICs with iSCSI over RDMA
- Complete virtualization solution for VMware, Windows Hyper-V, Citrix and Openstack
- Advanced Btrfs file system offering 65,000 system-wide snapshots and 1,024 snapshots per shared folder
- Scale up to 72 drives with 2 x Synology
   Expansion Unit RX2417sas<sup>4</sup>
- Backed with Synology's 5-year limited warranty & Synology Replacement Service (SRS)

### Rock-Solid Data Protection

The **Snapshot Replication** application provides schedulable, near-instantaneous data protection. It replicates **65,000** system-wide backup copies to offsite servers and local volumes, bringing near-instantaneous data protection and ensuring data in shared folders or virtual machines in iSCSI LUNs remain available in the event of a disaster.

With block-level incremental backup and cross-version deduplication, Synology **Hyper Backup** provides multi-version backup with optimized storage space utilization and allows multiple backup destinations to local shared folders, external hard drives, network shared folders, rsync server, and public cloud services.

### **Comprehensive Business Applications**

Powered by the innovative Synology **DiskStation Manager (DSM)**, FS3017 comes fully-equipped with applications and features designed specifically for large-scale business:

- **Windows® AD** and **LDAP** support allowing easy integration with existing business directory services without recreating user accounts.
- **Windows ACL** support provides fine-grained access control and efficient privilege settings, allowing FS3017 to fit seamlessly into current infrastructure.
- MailPlus allows your business to set up a secure, reliable, and private mail server while giving your employees a modern mail client for receiving and sending messages.

### Reliability and System Availability

System reliability is of paramount importance to businesses which depend upon their commercial servers every day. FS3017 responds to these concerns with wide-ranging availability and redundancy features:

- Synology **RAID F1** optimizes RAID volume integrity and extends SSD lifespan.
- Synology **High Availability** ensures seamless transition between clustered servers in the event of one node failing with minimal impact to applications.
- Redundant power supplies, system fans, and multiple network ports with failover support ensure maximum continuous service uptime.
- **DDR4 ECC RDIMM** detects and corrects errors during data transmission.
- The tool-free system fan design allows hot swapping and simple exchanging
  of malfunctioned system fans. Optional Synology RKS1317 rail kit provides
  fast and easy system installation and maintenance.

### Mainstream SSD Support

Synology FS3017 comes with 24 x 2.5" SAS / SATA interfaces and is compatible to major SSD brands, preventing vendor lock-in.

### Hardware

CPU	2 x Intel Xeon E5-2620 six-core 2.4GHz
Hardware encryption engine	Yes (AES-NI)
Memory	64 GB DDR4-2133 ECC RDIMM, expandable up to 512 GB
Compatible drive type	24 x 2.5" SAS SSD / HDD or SATA SSD
External ports	2 x USB 3.0
Size (HxWxD)	<ul> <li>88 x 430.5 x 692 mm</li> <li>88 x 482 x 724 mm (with server ears)</li> <li>2RU</li> </ul>
Weight	17.13 kg
LAN	2 x 10GbE (RJ45)
PCIe 3.0 slot	<ul> <li>x16 slot x 1 (16-lane)</li> <li>x8 slot x 1 (8-lane)</li> <li>10GbE / 25GbE / 40GbE network interface cards support</li> </ul>
Scheduled power on / off	Yes
System fan	4 (80 x 80 x 32 mm)
AC input power voltage	100V to 240V AC
Power frequency	47 to 63Hz, single phase
Operating temperature	5°C to 35°C (40°F - 95°F)
Storage temperature	-20°C to 60°C (-5°F to 140°F)
Relative humidity	5% to 95% RH
Maximum operating altitude	5,000 m (16,400 ft)

### General

Networking protocol	CIFS, AFP, NFS, FTP, WebDAV, CalDAV, iSCSI, Telnet, SSH, SNMP, VPN (PPTP, OpenVPN ™, L2TP)
File system	<ul> <li>Internal: Btrfs, ext4</li> <li>External: Btrfs, ext4, ext3, FAT, NTFS, HFS+, exFAT³</li> </ul>
Storage management	<ul> <li>Maximum single volume size: 108TB, 200TB (RAID 5 or RAID 6 groups only)</li> <li>Maximum internal volumes: 1,024</li> <li>Maximum iSCSI Targets: 128</li> <li>Maximum iSCSI LUNs: 512</li> <li>iSCSI LUN clone / snapshot support</li> </ul>
Supported RAID type	Basic, JBOD, RAID 0, RAID 1, RAID 5, RAID 6, RAID 10, RAID F1
File sharing capability	<ul> <li>Maximum user account: 16,000</li> <li>Maximum user group: 512</li> <li>Maximum shared folder: 512</li> <li>Maximum concurrent CIFS / AFP / FTP connections: 13,000</li> </ul>
