HPE GreenLake

HPE edge-to-cloud adoption framework
Operations domain

Strategy and governance	Innovation
People	**Operations**
Data	Applications
DevOps	Security

The operations domain covers the capabilities needed for effective day two operations of a hybrid estate, as well as the core infrastructure elements and services of IT.

This includes adaptations needed in core functions such as such as incident, problem, change and configuration management to support a modern, high velocity operating model.

Visit **HPE GreenLake**

Service operations
