

HPE GreenLake for AI and Analytics

What's new

- Drive your data-first modernization.

Overview

To help you mine continuous streams of value locked in your data, HPE GreenLake delivers a trusted, enterprise-grade AI/ML and analytics cloud-like experience so you can accelerate your data modernization initiatives, from edge to cloud. With a cloud-native architecture, support for open source data science tools, and AI accelerators and frameworks, it provides choice and an elastic, unified analytics platform for data and applications on-premises, at the edge, and in public clouds. The consistent experience helps data, IT teams, developers, and analysts simplify the complexities of machine learning lifecycles and data management at scale, leading to better, faster decisions no matter where your data resides.

Features

Unify and share analytics

Achieve up to 35% more efficiency [1] than the public clouds using the industry's first Kubernetes-native unified, hybrid analytics and data lake platform. With your S3 all databases combined in one scalable data platform, your data scientists can collaborate on mission-critical projects

Operationalize and automate machine learning

Accelerate development with a cloud-like experience to standardize and operationalize the ML lifecycle from planning to model development and monitoring. With the ability to provision testing and development environments in minutes, you gain rapid innovation that can evolve quickly to changing data.

Scale and modernize AI infrastructure

Deploy converged HPC/AI workloads on GPUs and high-performance clusters with predictable, transparent costs. You can quickly scale as needed with next-generation architecture and, using continuous monitoring, you can right-size capacity and even enable capacity-bursting on-site, on demand.

Extend your resources with AI and data expertise

Tap the broad and deep set of HPE experts in AI/ML, analytics, HPC, cloud, Edge/IoT services and position your developers and data scientists for successful AI solution deployment. With comprehensive support, your teams can bridge their knowledge gap and sustain your AI solutions at enterprise scale

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GreenLake

HPE GreenLake edge-to-cloud platform is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
