Are you a WatchGuard Partner? Start here (English only).

Activate WatchGuard Products

You can use the same steps to activate free 120-day trials of both DNSWatchGO and AuthPoint.

1 Create an account at
https://accountmanager.watchguard.com/
Login/StartRegistration

Have an account already?
Just log in and go to step 3.

**2** You will receive an email to create your password.

3 Select **My WatchGuard** > **Manage Products**.

4 Click **WatchGuard AuthPoint** or **DNSWatchGo** and then click **Free 60-day trial.** Our trials support full product functionality.
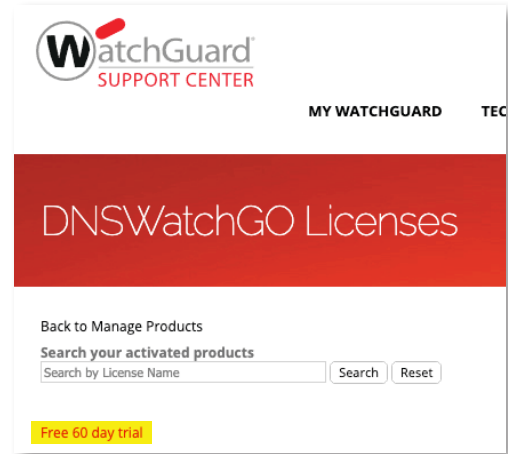

5 Name your trial license, then review and accept the End User License Agreement to finish. You're now ready to configure AuthPoint or DNSWatchGO and protect your users!
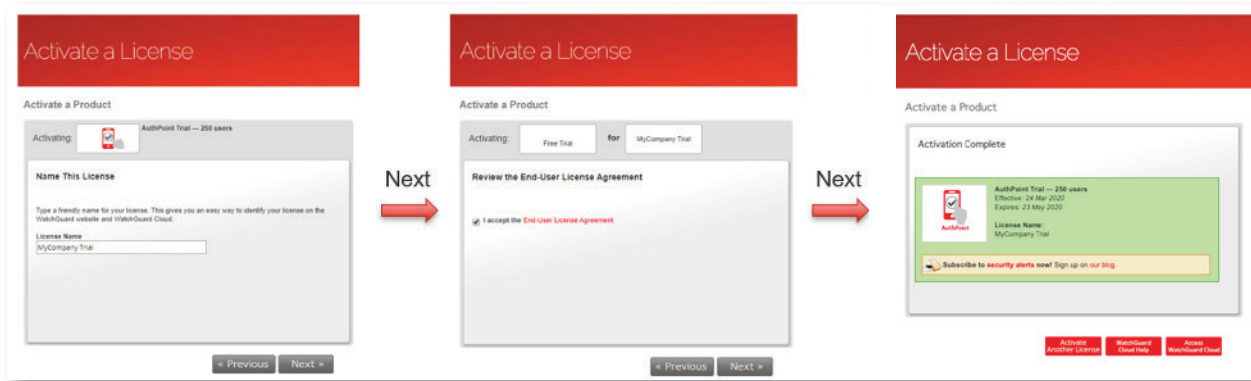

Need more time? Get another 60 days on us!

6 Repeat these steps to extend your trial for 60 days, for a total of 120.

Bonus Offer

Need more VPN capacity? Contact us for 120 days of FireboxV free

Cloud-hosted firewalls can help to load-balance VPN traffic destined for your HQ and scale to accommodate the connections your company requires. To help you get through the surge of VPN traffic, WatchGuard is offering **FireboxV licenses free for 120 days**. Three mobile VPN options are supported and available to accommodate your specific needs.

To register for your free FireboxV license, please contact your WatchGuard Partner directly.

Start using AuthPoint now at https://cloud.watchguard.com

For more information, see the AuthPoint Deployment Guide.

Start using DNSWatchGO now at https://dnswatch.watchguard.com

For more information, go here.
