## SIMPLE, CENTRALIZED MANAGEMENT AND SECURITY FOR ALL YOUR DEVICES

Fusion is a complete product able to **protect, manage and deliver remote support to all your IT devices, including smartphones and tablets**. As it is a Cloud solution, it is deployed rapidly without the need for maintenance or costly investments in server infrastructure.

Accessible from anywhere and at any time, Fusion is managed from a simple browser and offers:

- **Maximum protection against malware** and other unknown threats.

- **Cost savings** thanks to the **automation** of infrastructure management and **centralized control**.

- The **best support experience** with **proactive troubleshooting** and **remote, non-intrusive access** to devices, no matter where they are.

Supports multiple platforms and devices (printers, servers, mobiles and tablets, Mac, Windows and Linux, routers and switches…)

Centralized device management from the Cloud, from anywhere at any time from a simple browser

Anti-malware security and protection

MAXIMUM SECURITY

Protection for all devices inside and outside the office, 24 hours a day, 365 days a year, without the risk of data loss.

PROACTIVE SUPPORT AND MAINTENANCE

Rapid incident management and troubleshooting, with a minimal impact on users.

CENTRALIZED CONTROL AND MANAGEMENT

Permanent visibility of all hardware and software including workstations, servers, tablets, smartphones, printers and other components of the IT infrastructure.

Supported platforms and systems requirements for: ⊶ Panda Fusion

100% Cloud-Based Solution

- Protects, manages and supports all devices – at any time and from anywhere – including those in remote offices and laptops.
- No need for additional infrastructure on-site.
- Simple, central management via a web browser.
- Reduced resource usage: extremely light agent and reduced bandwidth usage when deploying software and automatically updating the protection.
- Secure service with ISO 27001, SAS 70, PCI DSS and FISMA certifications.

Security and Protection Against Malware

- Complete anti-malware protection for Windows, Linux, Android and Mac workstations, as well as servers and laptops.
- Maximum protection with real-time access to Collective Intelligence.
- Heuristic and anti-exploit technologies against new threats that exploit unknown vulnerabilities and zero day attacks.
- Firewall (personal or managed).
- Antivirus, anti-spam and content filter support for Microsoft Exchange 2007, 2010 and 2013.
- Centralized device control (USB data storage devices, DVD/CDs, modems, Bluetooth devices, etc).
- Centralized quarantine management.
- Category-based web filtering and monitoring.
- Remote data wiping and password protection for lost or stolen smartphones and tablets.
- Advanced tools for rootkit and rogueware detection.

Real-Time Device Inventory and Monitoring

- Visibility and control of all devices on the network, including smartphones and tablets.
- Control and monitoring of CPU usage, memory, disk space, services, software, etc.
- Performance graphs and on-screen warnings.
- Software and hardware change logs.
- License management.

Software and Updates Deployment

- Discovery of unpatched devices and centralized, automatic patching of operating systems.
- Centralized software installation.
- Ticketing system to organize and classify incidents, share troubleshooting procedures and documentation, etc.
- Script creation for automatic troubleshooting.
- Quick task creation.
- Scalable platform, ability to integrate free components.

Remote Automatic Support

- Non-disruptive access: remote event logs, command line, task manager, file transfer, registry editor.
- Remote desktop access: Shared access or complete control.
- Messaging system for direct communication between users and the IT department.
- Ticketing system to organize and classify incidents, share troubleshooting procedures and documentation, etc.
- Script creation for automatic troubleshooting.
- Quick task creation.
- Scalable platform, ability to integrate free components in our ComStore.

CLOUD MANAGEMENT PLATFORM

The Aether Cloud platform and its console optimize management of the advanced adaptive security provided by Panda Adaptive Defense 360 for all endpoints and servers inside and outside the corporate network. The solution is designed to minimize complexity while maximizing flexibility, granularity and scalability.

Generates Greater Value In Less Time. Quick and Easy Implementation

- Deployment, installation and configuration of the solution in minutes. See the value from day one.
- Single, lightweight agent for all products and platforms (Windows, Mac, Linux, and Android).
- Automatic discovery of unprotected endpoints. Remote installation.
- Proprietary proxy and repository/cache technologies. Optimized communication even with endpoints with no Internet connection.

Simplifies Operations. Adapts To Your Organization

- Intuitive web console.
- Flexible, modular management that reduces the total cost of ownership.
- Configure users with total or limited visibility and permissions. User activity audit.
- Group and endpoint-based security policies. Predefined and custom roles.
- Hardware and software inventories and changelogs.

Easy Scaling of Security and Management Capabilities Over Time

- No need for new infrastructure to deploy modules. No deploy-ment costs.
- Real-time communication with endpoints from a single web management console.
- Dashboards and indicators for each module.
