

Automated Patching of Microsoft® Servers & 3rd-Party Apps

SolarWinds Patch Manager makes it easy to perform third-party patch management across tens of thousands of servers and workstations and enables you to leverage and extend the capabilities of Microsoft WSUS or SCCM to report, deploy, and manage third-party patches as well as Microsoft patches.

Patch Manager at a Glance

“What’s great about SolarWinds Patch Manager is that everything is right there in a single interface, having a one-stop shop for patches and updates makes a world of a difference!”

—Brendon DeMuth
City of Roseburg
Technical Support

- Reduce time from weeks to minutes for patching physical & virtual Windows® desktops & servers with pre-built, tested patches from vendors such as Adobe®, Apple®, Google®, Mozilla®, Oracle® & others
- Decrease security risks & service performance degradation by controlling when & where patches are applied
- Pass audits & demonstrate compliance with out-of-the-box reports & dashboard views
- Turn your WSUS or SCCM environment into a powerful patch management solution
- Get the best ROI with agentless architecture, mass scale, and ease of use — no scripting or professional services needed

Patch Manager Features

Intuitive Web Interface

Patch Manager's Web user interface lets you view important patch management data alongside other SolarWinds products in an integrated Web console. You can view the latest available patches, top 10 missing patches in your environment, and general health overview of your environment based on which patches have been applied.

Extend System Center Configuration Manager

SolarWinds Patch Manager extends your Microsoft SCCM deployment with pre-tested, pre-built 3rd party updates and provides many time-saving management features to help you get more out of your Configuration Manager investment.

Patch Compliance Reporting

SolarWinds Patch Manager provides you with the easy-to-use and powerful reporting options so that you can easily determine the status of patches and demonstrate to auditors that systems are patched and compliant — or find those that are not.

Extended Power of Microsoft WSUS

SolarWinds Patch Manager works with and extends Microsoft WSUS to give you more control and power over the patch management process with dynamic patch management, immediate updates, scheduled reboots, easy reporting, full asset inventory, and more.

Simplified Patch Management

SolarWinds Patch Manager simplifies many of the steps in the patch management process — from research, to scheduling, to deployment, to reporting and more — saving you hours of time and making it easier to keep hundreds or hundreds of thousands of servers and workstations patched and compliant.

Centralized Patching of Microsoft Servers and Third-Party Apps

SolarWinds Patch Manager enables you to deploy and manage both third-party applications and Microsoft patches, from a central point of control, across tens of thousands of servers and workstations. Microsoft SCUP and complicated scripting NOT required.

Pre-Tested, Pre-Built Packages for Common Apps

SolarWinds builds, tests, and automatically delivers packages for common third-party applications which can then be quickly and easily deployed using Microsoft WSUS or Microsoft SCCM.

Custom Package Wizard

The Custom Package Wizard in SolarWinds Patch Manager gives you an easy way to build custom packages for any application, without the use of SCUP or complicated scripting. Then, using SolarWinds Patch Manager, you can deploy any MSI, MSP or EXE via Microsoft WSUS or SCCM.

Advanced Before-and-After Package Deployment Actions

SolarWinds Patch Manager's PackageBoot™ allows you to create advanced before and after package deployment scenarios to ensure that even the most complicated patches (such as Oracle Java) get deployed successfully — without complicated scripting.

Patch Physical Servers and Virtual Machines

SolarWinds Patch Manager makes it easier to manage patches on virtual desktops and servers with the ability to patch offline machines, organize virtual machines into groups, and inventory virtual machines enterprise-wide.

Try Before You Buy. Download a Free Trial!

Patch management has never been simpler! Don't just take our word for it. SolarWinds Patch Manager lets you deploy patches across your Windows servers and workstations in hours — not weeks. Download your free, fully-functional trial today!

System Requirements

HARDWARE	
CPU	Pentium 1.5 GHz equivalent or faster (x86, x64, or AMD64 — dual or quad core recommended)
Memory	2GB RAM (4GB RAM for x64 systems)
Hard Drive	10GB free disk space is recommended
Software	Minimum Requirements

SOFTWARE	
Windows Server Update Services (WSUS) Requirements	Windows Server Update Services 3.0 SP1 or higher
Management Console Operating System	Windows XP Professional SP3 or later Windows Vista Business, Enterprise, or Ultimate SP2 Windows 7 Professional, Enterprise, or Ultimate Windows Server 2003 SP2 or later Windows Server 2003 R2 SP2 or later Windows Server 2008 Windows Server 2008 R2
Managed Computers Operating System	Windows 2000 Workstation SP4 or later Windows 2000 Server SP4 or later Windows XP Professional SP2 or later Windows Vista Business, Enterprise, or Ultimate Windows 7 Professional, Enterprise, or Ultimate Windows Server 2003 SP1 or later Windows Server 2003 R2 SP1 or later Windows Server 2008 Windows Server 2008 R2
Automatically Installs	Microsoft .NET Framework v3.5 SP1 Microsoft Management Console v3.0 Microsoft SQL Server 2005 Sp3 (Express Version)

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

About SolarWinds

Founded in 1999, SolarWinds delivers powerful and affordable IT management and monitoring software to over 100,000 customers worldwide — from Global 1000 enterprises to small businesses. Named by Forbes as one of the top 10 fastest growing technology companies, SolarWinds is improving the way IT management software is developed, priced, purchased, delivered, and used. Our IT monitoring and management software is built for SysAdmins and network engineers who need powerful, affordable, and easy-to-use solutions that save time and simply get the job done. Evaluating, buying, deploying, and using enterprise software shouldn't be complex. IT management solutions from SolarWinds are easy to try, buy, deploy and use. That's unexpected simplicity.
