Bring Your Network To Your Employees With **Enterprise at Home**

JUNIPER NETWORKS® | Engineering Simplicity

The Enterprise at Home solution leverages Mist Wi-Fi, Mist Edge, and Juniper Connected Security to extend the AI-driven enterprise to remote workforces. Using zero-touch provisioning, Juniper security hardware and Mist Wi-Fi access points can be deployed remotely without a technician visit.

The shift to a remote workforce has made business continuity more important. Keeping users connected, productive and secure without losing the agility and reliability needed to scale to support evolving demands.

Up to 75 million U.S. employees could work remotely.*

According to a recent Gartner CFO survey, nearly a quarter of respondents said they will move at least 20% of their on-site employees to permanent remote positions.**
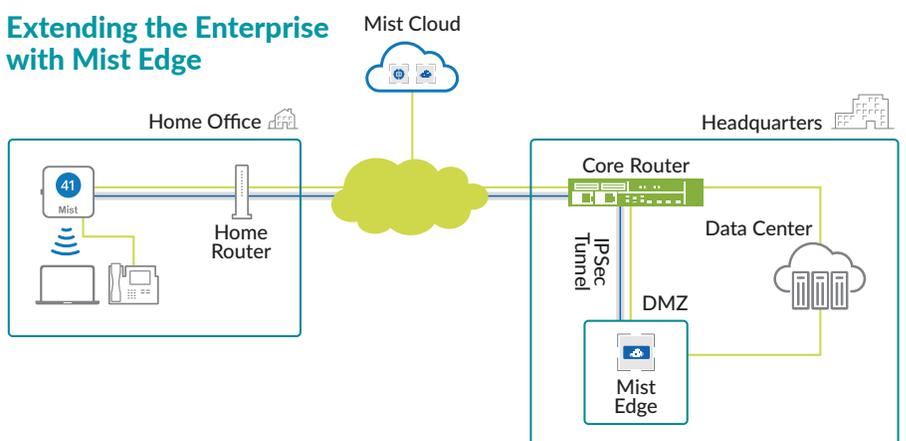

62% of employed Americans currently say they have worked from home during the crisis, a number that has doubled since mid-March.***
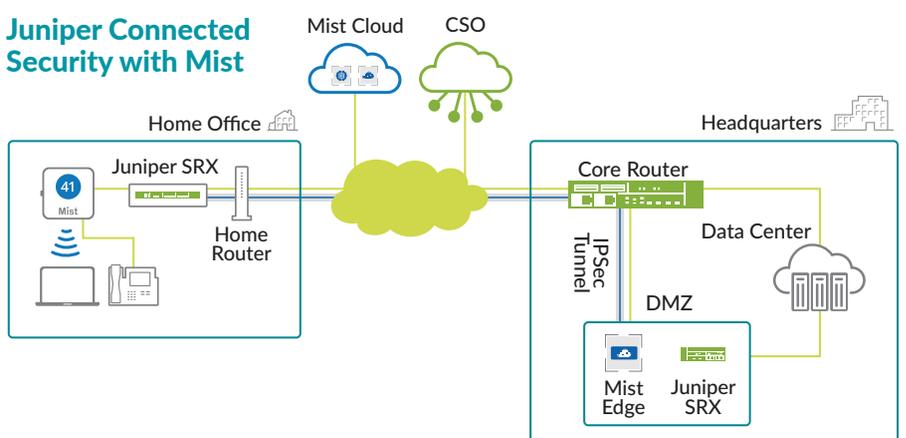

Mist Wi-Fi for Remote Workers

Mist Cloud • Home Office • with VPN Client • Home Router • Headquarters • Core Router • IPSec Tunnel • Data Center • DMZ • Juniper SRX (or 3rd party VPN server)

Extending the Enterprise with Mist Edge

Mist Cloud • Home Office • Home Router • Headquarters • Core Router • IPSec Tunnel • Data Center • DMZ • Mist Edge

Juniper Connected Security with Mist

Mist Cloud • CSO • Home Office • Juniper SRX • Home Router • Headquarters • Core Router • IPSec Tunnel • Data Center • DMZ • Mist Edge • Juniper SRX

- Gain AI-driven insights into remote user experiences
- Eliminate overlay VPN technologies
- Monitor Wi-Fi to secure corporate traffic
- Increase security and segment business traffic
- Keep threats in check with advanced security services
- Cultivate a dynamic, flexible, adaptable network
