# IronSchool

Attack Simulation and Phishing Awareness Training

Key Business Benefits

1.

Reduce phishing click rates through continuous assessment and training.
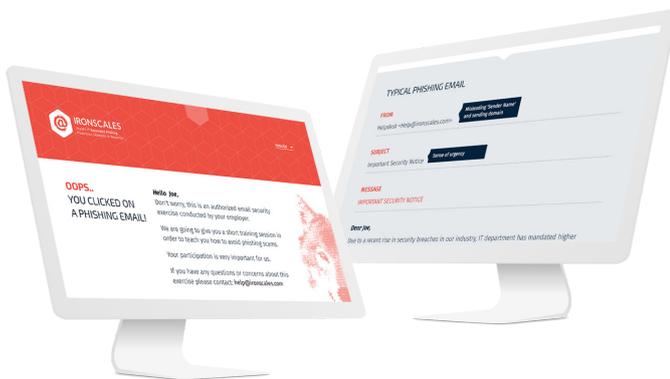

2.

Leverage human awareness to report suspicious emails missed by technical controls such as Secure Email Gateways (SEG).

3.

Increase detection rates and reduce detection times.

How is IronSchool's Security Awareness Training Unique?

Unlike the traditional one size fits all approach to security awareness training, IronSchool starts with an initial employee assessment to benchmark individual users phishing recognition skills. Each user is then automatically graded, and based on performance levels, a training campaign comprised of short, staged, real-world phishing attacks is tailored to help improve the employees' awareness of malicious email messages.

Multi-Level, Gamified, Interactive Micro-Learning

Simulating mock phishing attacks increases phishing awareness training and responsiveness to current and trending techniques. To aid in phishing protection, our gamified, interactive micro-learning method trains each employee individually to think and act as a security team member, becoming proactive against a multitude of attack types. All trainings are personalized and gamified to make learning about phishing quick, easy to remember and fun.

IronShool Premium

NINJI😑

IRONSCALES will license NINJIO'S full library of award-winning micro-learning phishing simulation videos, thereby expanding the premium content available to users of IronSchool.
NINJIO Episodes are written by a Hollywood story teller, are based on or inspired by significant breaches suffered by real organizations and focus on a single attack vector per episode.

Benefit from an additional 42 training videos, including PCI, HIPAA, NIST and GDPR with monthly new episodes.

Why IronSchool?

- Measurable phishing awareness training
- Multi-level employee tailored campaigns
- End user intelligence is fed upstream to other IRONSCALES modules
- Unique employee scoring to prioritize champion reporters

Features

- Phishing Report Button
- Customizable templates
- On-mail real-time assistance
- Aggregated reports

Deployment

IronSchool is available as a quick and easy two-click deployment for Office365 and G Suite in the cloud, on premise, or hybrid, with no MX records changes required.
