

Vess A8000 Series

Engineered for Surveillance

Vess A8600 and Vess A8800 are designed for the storage needs specific to video recording and Intelligent Video Analytics (IVA) applications. Options include an additional Intel Xeon CPU or a GPU card for IVA, Al-optimized and processor intensive applications.

The system included industry proven

SmartBoost™ technology to ensure
high-performance storage for continuous
video recording and playback without
dropping frames; as well as GreenBoost™
technology to reduce power consumption,
noise and thermal output. Capacity can be
scaled up to as much as 320TB or 480TB for
the Vess A8600 and A8800 systems
respectively with additional Vess R Series and
Vess JBOD storage hardware. The systems
support VMS integration from most major
vendors for simplified management of large
video surveillance networks.
