If you need to search all the documentation for a particular term, click here.
Or simply click on Enterprise-Client.pdx in the navigation directory.

Secure Enterprise Suite Installation

- ⊙ Product Description
- ⊙ Registry Repair (RegRep)
- ⊙ Notes for Installing
- ⊙ Communication Media
- ⊙ Automatic Media Detection
- ⊙ Prerequisites for using Certificates
- ⊙ Installing the Software
- ⊙ Assistant for initial Configuration
- ⊙ Secure Client Programs
- ⊙ Dynamic Personal Firewall
- ⊙ Licensing
- ⊙ Tests of the Client
- ⊙ Extended Installation
- ⊙ Uninstalling

Secure Client Monitor

- ⊙ Generic User Interface
- ⊙ View Menu
- ⊙ Autostart Options
- ⊙ Company and Project Logo integrated into Client Interface
- ⊙ Parameter Locks
- ⊙ Client-Side Profile Creation
- ⊙ New Profile with the Configuration Assistant
- ⊙ Symbols and Messages on the Graphic Display
- ⊙ Profile Selection and Connection Establishment
- ⊙ Passwords and User IDs
- ⊙ Information Windows of the Client
- ⊙ Statistics
- ⊙ Connection Info
- ⊙ Available Communication Media
- ⊙ Logbook
- ⊙ Budget Manager Statistics
- ⊙ Info Window
- ⊙ Client Info Center
- ⊙ EAP Options
- ⊙ Logon Options
- ⊙ Messaging Center (SMS)

Configuration Modes

- ⊙ Standard
- ⊙ Enhanced
- ⊙ Expert Mode
- ⊙ Configuration of Seamless Roaming

Enterprise Client Parameters

- ⊙ Basic Settings
- ⊙ Dial-Up Network
- ⊙ Modem
- ⊙ GPRS / 3G
- ⊙ HTTP Logon
- ⊙ Line Management
- ⊙ Callback
- ⊙ Security
- ⊙ Advanced
- ⊙ Pre-authentication
- ⊙ VPN Tunneling
- ⊙ Advanced IPsec Options
- ⊙ IPsec Address Assignment
- ⊙ Split Tunneling
- ⊙ HA Support
- ⊙ DNS/Management
- ⊙ Certificate Check
- ⊙ Link Firewall
- ⊙ Index

IPsec Configuration of the Client

- ⊙ IKE Policy
- ⊙ IPsec Policy

Personal Firewall and Friendly Net Detection

- ⊙ Functions of the Personal Firewall
- ⊙ Friendly Net Detection and Stateful Boot Option
- ⊙ Firewall Settings
- ⊙ Mode of Operation of Friendly Net Detection
- ⊙ Example: Application Dependent Rule
- ⊙ Example: Friendly Net Detection
- ⊙ Basic Settings and predefined NCP rules
- ⊙ Creating and Editing the Rules Table
- ⊙ Configuration Menu of the Personal Firewall
- ⊙ Installation and Configuration of the FND-Server
- ⊙ Authentication with MD5 and TLS
- ⊙ Starting the NCPFND Service
- ⊙ Index

Seamless Roaming

- ⊙ Seamless Roaming Functionality
- ⊙ Technical Overview
- ⊙ Default Settings for Seamless Roaming
- ⊙ Visual Feedback
- ⊙ Maintain wireless connection in Expert Mode
- ⊙ Switching off the default Behavior
- ⊙ Application example
- ⊙ Configuration example

IPsec Functionality

- ⊙ The IPsec Process
- ⊙ IPsec Services / -Policy
- ⊙ Security Association (SA)
- ⊙ SA Negotiation and Policies
- ⊙ IKE Modes
- ⊙ Configuring IPsec Tunneling with NCP Clients
- ⊙ Default IKE Proposals
- ⊙ Default IPsec Proposals
- ⊙ IPsec Tunneling Parameters
- ⊙ IPsec for Remote Access

L2sec Encryption

- ⊙ L2sec Encryption Type (RFC 2716)
- ⊙ Functional Description

Certificates

- ⊙ Certificates at the Secure Client
- ⊙ Multi Certificate Configuration
- ⊙ Manual Configuration
- ⊙ Certificate Configuration
- ⊙ User Certificate
- ⊙ Entrust Profile
- ⊙ PIN Policy
- ⊙ Certificate Renewal
- ⊙ Hardware Certificate
- ⊙ View Certificates
- ⊙ PIN Entry
- ⊙ PC-Sharing (Using multiple Soft Certificates on one Client PC)

Entrust Ready Funktionalität

- ⊙ Installed Components
- ⊙ NCP Service Pack "Entrust Ready"
- ⊙ Download Entrust Profile

Mobile Computing

- ⊙ 3G Card
- ⊙ Create a Profile for Cell Phone Connections
- ⊙ Basic Settings and GPRS / 3G Configuration
- ⊙ The 3G Card in the Client Monitor
- ⊙ Activating GPRS / 3G
- ⊙ Wireless LAN
- ⊙ Wi-Fi Connection and Wi-Fi Profile
- ⊙ Configuring WISPr
- ⊙ VPN Connection and Wi-Fi Status
- ⊙ Wi-Fi Automatism
- ⊙ Secure Mobile Computing
- ⊙ Automatic Hotspot Logon
- ⊙ Hotspot Configuration
- ⊙ Hotspot Logon

Budget-Manager Functional Description

- ⊙ Budget Manager Functions
- ⊙ Budget Limitation according to Volume or Time online
- ⊙ Monthly Log
- ⊙ Smaller Budgets for Mobile Computing
- ⊙ Call Control Management for individual WLAN Profiles
- ⊙ Avoid costly Roaming
- ⊙ Budget Statistics and automated Warnings
- ⊙ Budget Manager History

About the Navigation

To make it easier for you to find your way through the documentation pertaining to NCP Secure Client, we have put together a structure for the table of contents on the following pages.

This structure contains the full documentation, beginning with the installation of the product, continuing on with initial software startup, right down to the detailed configuration and description of particular scenarios.

You will have to have Adobe Acrobat Reader installed on your machine, to utilise the Navigator. (Please read the default settings of Acrobat Reader as well). Please also insure that all documents, including the Start-Enterprise-Navigaton application, are unpacked and stored in one directory (e. g. "Enterprise-Navigation"). At present these documents are:

Enterprise-Suite-Installation-e.pdf
 Enterprise-CI-Monitor-e.pdf
 Enterprise-CI-Parameters-e.pdf
 Enterprise-CI-Seamless-Roaming-d.pdf
 Enterprise-CI-Mobile-Computing-e.pdf
 Enterprise-CI-Certificates-e.pdf
 Enterprise-CI-Firewall-and-FND-e.pdf
 Enterprise-CI-IPsec-Functionality-e.pdf
 Enterprise-CI-L2sec-Encryption-e.pdf
 Budget-Manager-Functional-Description-e.pdf
 Entrust-Ready-Functionality-e.pdf

All documents need to be present in one directory, for you to click through all references. If any of these documents are not available on the Client CD ROM, please make sure to download any missing files from the NCP website:

<http://www.ncp-e.com/en/support/library/manuals.html>

How to use ...

Once you have opened the Navigator via Acrobat Reader, you will be presented with a structural chart of all available documents.

The titles of the individual documents are depicted in red font. Clicking on one of the titles will open the relevant document at its title page.

Under each document title, you will find various chapters and keywords with embedded **targets**. Clicking on any of these links will navigate directly to the relevant document section.

In longer documents you can directly access the individual chapters by clicking on their titles in the table of contents. Provided you adhere to the following conventions, you will be able to access **linked references** directly by clicking in a document.

While reading the document, click on the terms depicted in **bold red font**, and you will navigate directly to the relevant section in the document.

Relevant Icons

Should there be an icon for an **NCP PDF** (left) visible next to the term in red, then the corresponding document will be opened via mouse click, provided the document is stored in the same directory.

This **button** leads you back to the table of contents of the Navigator, and closes the current document.

Other Icons

The **info icon** marks locations with a general description.

The **lightbulb icon** indicates optimization options.

The **warning icon** points out incorrect configurations.

The **tool icon** is visible only, where the administrator can intervene, or should do so to optimize flow.

Clicking on an email address or URL will open the default browser. Clicking the NCP logo will do the same.

If a document fails to open, please verify that it was saved in the same directory as the Navigator.

Default Setting of Acrobat Reader

If you would like to open another document from within the navigation PDF, just click one of the link nodes. You will have to perform a basic configuration of your Acrobat Reader to ensure that the Navigator will remain open on the desktop, and that you will be able to access other documents from there.

Change the settings in the menu "Edit" to allow any additional PDF documents to be opened in a new window. Under "Preferences" select the category "Documents", and deselect the following options: "Open cross document links in same window".
