Product Launch

NCP Exclusive Entry Client for Juniper SRX/vSRX

NCP SECURE COMMUNICATIONS

Product Description

The NCP Exclusive Entry Client (Windows) was developed for and exclusively connects to Juniper Networks® SRX Series Gateways. It was designed for smaller installations and single workplaces (SMB). Thereby it completes the NCP Exclusive Remote Access Solution for large installations (managed Exclusive Clients incl. Management System) but opposed to those clients, the NCP Exclusive Entry Client is an unmanaged standalone client.

The VPN Client Suite offers features such as the Personal Firewall, the patented NCP Path Finder Technology (which was also integrated in the SRX series), biometric authentication (e.g. fingerprint or facial recognition) as well as a new Credential Provider with hot spot logon. Due to perfect technical support on both sides, the NCP Client fits into the SRX Series Services Gateways without any problems.

Licensing, Pricing Model & Activation

Licensing and pricing
Software licenses are available as a subscription for:

- 3 years   USD 59,- / EUR 50,- per client (order numbers: new JEEC3Y / renewal RJEEC3Y)
- 2 years   USD 49,- / EUR 42,- per client (order numbers: new JEEC2Y / renewal RJEEC2Y)
- 1 year   USD 35,- / EUR 29,- per client (order numbers: new JEEC1Y / renewal RJEEC1Y)

In order to activate and use the NCP Exclusive Entry Client one enters the subscription key via the activation assistance tool of the client. Please notice one needs an online connection for this step.

End of term and subscription renewal
The subscription requires a renewal and renewal key. 60 days prior to the expiration of the subscription period, the remaining duration will be displayed in the client. After applying the renewal key, the purchased term will be added to the end of the previous subscription.

Germany: NCP engineering GmbH • Dombuehler Str. 2 • 90449 Nuremberg • Phone +49 (911) 9968-0

Americas: NCP engineering, Inc. • 678 Georgia Ave. • Sunnyvale, CA 94085 • Phone: +1 (650) 316-6273 • www.ncp-e.com   Page 1 of 2

As soon as the client subscription expires, you will not be able to establish a VPN tunnel anymore. Should the renewal key be introduced after the expiration date, the new end of term will be added to the day after the previous expiration date.
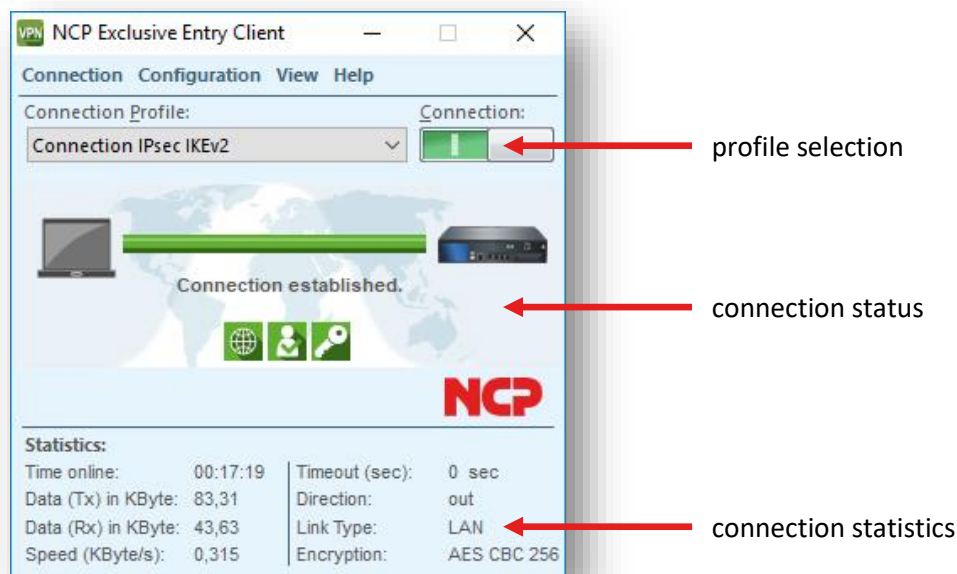

Software Subscription & Updates
During a valid subscription period the user is entitled to update to the latest versions at any time.
