GIGABIT ETHERNET SWITCHES

KEY BENEFITS

EASY TO DEPLOY

The Xirrus XT enterprise-class switches simplify integration with existing wired network infrastructure and deliver a reliable, robust, high performance Gigabit wired access network.

UNIFIED MANAGMENT

The Xirrus Management System manages the unified wired and wireless Xirrus network – Enterprise on Hyper-V or VMware, providing an easy-to-use, single view management console to simplify IT operations.

ADVANCED SECURITY

Xirrus XT switches include standards based authentication, authorization and accounting (AAA) security features to block address spoofing and lock down access control and MAC locking.

XT-5003

XT-5024 | XT-5048

AT A GLANCE

- Unified wired and wireless management
- Easily integrate with existing network
- Cost effective in-room connectivity
- Scale wired access network with stacking

GIGABIT ETHERNET SWITCHES

HIGHLIGHTS

SCALABLE CAPACITY

Switches can be stacked together to simplify management with a single IP address. Network capacity can be added into the stack as the demand for bandwidth and connectivity grows, up to eight nodes per stack. Xirrus XT switches support up to 40Gbps of high bandwidth access to the core of the network.

INTEGRATED IP SERVICES

The three-port wall switch delivers integrated IP services and supports IP TV, IP phones and other IP-enabled devices. Latency sensitive applications such as streaming video and VoIP traffic can be prioritized with standards based QoS for superior user experience..

INTELLIGENT POWER OVER ETHERNET

Intelligent power management optimizes power distribution based on end device capability and provides Power over Ethernet for IP-based devices including IP phone, Wi-Fi APs and IP video.

Product Series	Description
XT-5024	24 ports Gigabit Ethernet stackable switch
XT-5048	48 ports Gigabit Ethernet stackable switch
XT-5003	3 port wall multi-services Gigabit Ethernet switch
