# K-12 Solutions: At a Glance

Safeguarding Technology for Today's Classrooms

Ensure real-time breach prevention while securing access to resources from anywhere.

K-12 Challenges	SonicWall K-12 Solutions
Lack of cybersecurity expertise and resources to maintain adequate and unified security posture across all devices against today's threats	Provide comprehensive protection against a wide range of cyberthreats with a team of around-the-clock security experts with SonicWall's Managed Extended Detection and Response (XDR).
Increased attack surfaces due to greater connectivity requirements of online learning and new technologies	SonicWall's NGFW and Capture Client grant the control and visibility needed when maintaining effective cybersecurity posture across the network and at the endpoint.
Need to comply with PII, web safety (e.g.- CIPA), and more	Comply with CIPA regulations through enforcing granular web policies and safe internet use with content filtering on our NGFWs and Capture Client.
Difficulty in supporting and protecting both on-prem and virtual learning environments	Enable secure remote or in-person classwork with SonicWall Switches, SonicWave Access Points, Capture Client, and NGFWs for seamless connectivity and built-in security features.
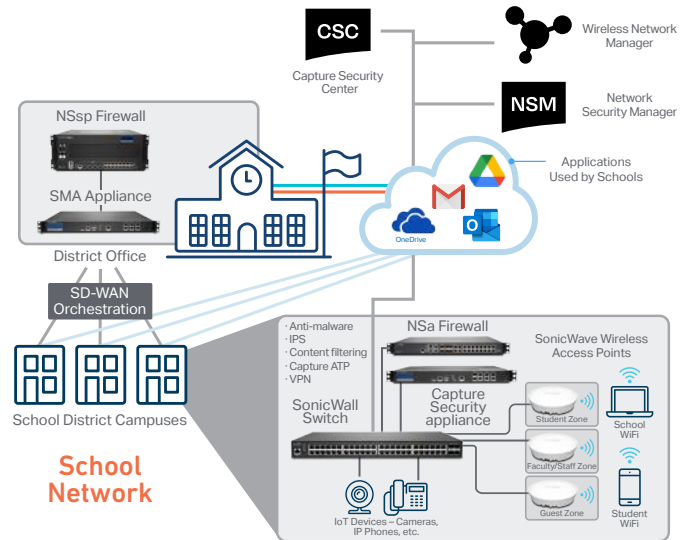

> *"We feel very well protected and have not experienced any security breaches or content filtering issues."*

Use Case Scenarios

SonicWall solutions provide robust cybersecurity at every layer, tailored to diverse K-12 education needs, ultimately ensuring safe and effective learning environments.

- *For in-person learning*, SonicWall's Next-Generation Firewalls (NGFWs), SonicWave Access Points and SonicWall switches deliver secure, high-speed internet access across campus, protecting against threats and unauthorized access.

- *In remote and hybrid learning scenarios*, Capture Client can enable secure access on devices taken home by providing security controls and content filtering at the endpoint.

- *For schools with limited security resources*, SonicWall's Managed Extended Detection and Response (XDR) offers 24/7 security monitoring and management.

SonicWall Benefits for K-12

- Facilitates a layered security approach most effective against today's threats and modern learning environments
- Enables secure at-home and remote classwork over any endpoint device
- Low total cost of ownership with 100% E-Rate eligibility in the United States on certain products and services

- Helps compliance with CIPA and other regulations
- Provides cybersecurity expertise to manage tools and critical alerts at any hour of the day
- Consolidated management and monitoring improves security posture and streamlines processes for stretched IT teams
