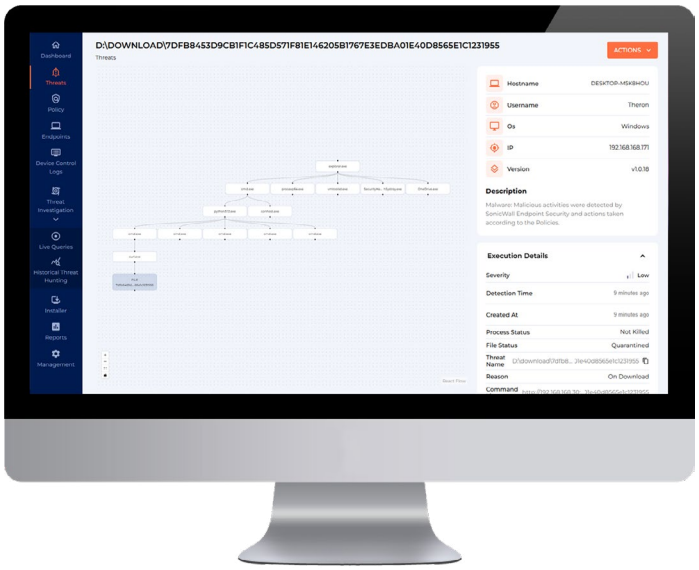
DATASHEET

SonicWall Endpoint Security

AI-powered endpoint security built on patented technology and managed by a team of expert threat hunters.

SonicWall Endpoint Security is a powerful, yet affordable endpoint solution purpose-built for MSPs and the small-to-medium sized businesses they serve. Combining next-generation antivirus (NGAV) with advanced endpoint detection and response (EDR) on a single lightweight agent, it delivers enterprise-grade protection without overwhelming budgets or adding unnecessary complexity.

As endpoint threats grow more advanced, MSPs and SMBs need more than basic antivirus. Many turn to low-cost, piecemeal tools—but these can introduce risk through integration gaps and operational inefficiencies. SonicWall eliminates those pain points with robust, built-in protection that's easy to deploy, manage, and scale.



Powered by SonicWall's patented Real-Time Deep Memory Inspection (RTDMI®) engine, this all-in-one solution offers ransomware restore, behavior-based detection, deep file inspection, and live threat hunting in a cost-effective package. It's ideal for growth-focused MSPs looking to simplify their stack, strengthen client security, and grow their bottom line.

HIGHLIGHTS

- Affordable enterprise-grade protection backed by 30+ years of threat research
- Comprehensive NGAV and EDR capabilities, including ransomware restore, multi-engine scanning, and cloud sandboxing
- Patented RTDMI technology delivers real-time analysis and zero-day threat detection
- Deep telemetry with live and historical threat hunting capabilities
- Built for MSPs: multitenant management and seamless integration with leading PSA, RMM, and IT tools
- Flexible deployment options: Unmanaged EDR or Fully Managed MDR

SONICWALL®

Key Features

Threat Prevention:

- **NGAV + EDR Agent**
  Stops known and unknown threats, collects data, and enables investigation and response from a single agent.
- **Multi-Engine Detection**
  Identifies threats through signatures, heuristics, and suspicious activity patterns—even before execution.
- **Cloud Sandbox**
  Isolates and detonates suspicious files in a secure cloud environment.

Threat Detection & Response:

- **Ransomware Restore**
  Quickly recovers wrongfully encrypted files using VSS shadow copies.
- **Device Isolation**
  Limits lateral movement while allowing investigation and remediation to continue.
- **Live and Historical Threat Hunting**
  Uncovers hidden attacks and suspicious patterns using endpoint data across time.

Management:

- **Unified Management**
  Streamlines operations with a single view for policy control, alerts, and reporting.
- **Multi-Tenant Hierarchy**
  Manage multiple customers or locations from a single platform.
- **Integration**
  Connects seamlessly with PSA, RMM, SIEM, and other security tools.

SonicSentry MDR for SonicWall Endpoint Security

Fully Managed threat protection with 24x7 SOC

For MSPs without dedicated security teams, SonicSentry MDR for SonicWall Endpoint Security takes protection even further. This fully managed MDR offering combines our powerful endpoint platform with 24/7 monitoring, proactive threat hunting, and expert response from SonicWall's Security Operations Center (SOC). It enables developing partners to deliver high-value, enterprise-grade protection—without the burden of staffing or managing Tier 1 support.

Partners who purchase SonicSentry Fully Managed MDR alongside other SonicWall solutions also gain access to embedded cyber warranty coverage through our partnership with Cysurance. In addition to the warranty, partners purchasing MDR who also have a SonicWall firewall and Cloud Threat Analytics are immediately qualified for discounted, flat-rate cyber insurance, backed and managed by Cysurance.

Key Benefits of SonicSentry MDR for SonicWall Endpoint Security:

- A thorough health check review by our SOC team for every new customer
- 24x7 expert monitoring for alerts and immediate threat response
- Available as a fully managed service that includes customer onboarding, policy management, threat detection & response and reporting
- Eliminates alert fatigue for MSPs
- Meet compliance and buyer insurance requirements
- Expanded cyber warranty up to $1M
- Immediate qualification for discounted, flat-rate cyber insurance, managed and backed by Cysurance
