

PROTECTION SERVICE FOR EMAIL

F-Secure Protection Service for Email provides the industry's most effective email protection for businesses by removing as much as 99.8% of spam.* Protection Service for Email is a turn-key solution for small and medium enterprises delivered by certified F-Secure resellers.

Email security challenges of SMEs

Email is a vital business tool for companies. Unfortunately, most of the email traffic today is spam that reduces your employee productivity and burdens your IT infrastructure. Protection Service for Email is a smart choice for companies with limited IT resources. You can concentrate on your business and let experts take care of your email protection.

Peace of mind with security as a service

With Protection Service for Email your business runs smoothly and you never have to worry about email protection or spam again. The solution is hosted by F-Secure whose expertise is trusted by more than 200 of the largest operators globally. Your local IT services partner deploys and manages the service for you. No hardware investments are required, which means that you pay as you go. Protection Service for Email is set up in one business day. Your company saves both time and money by letting professionals take care of email security.
