F-Secure® Server Security: Protect file servers without slowing down the system

Server Security comes in two versions: Standard and Premium. Premium version includes Software Updater, a turn- key solution that offers increased visibility to potential threats.

What's new:

1. Software Updater scans the computer for missing software updates and offers increased visibility to potential threats.

Key features:

- Server Security provides enhanced real-time protection against viruses, spyware and riskware
- Offers bahavior-based proactive detection for new threats with DeepGuard technology
- Multi-layered protection against exploits and document-based attacks
- Software Updater keeps operating system and 3rd party server software updated
- Centralized and local user interface management possibilities

Supported platforms:

The product can be installed on a computer running one of the following operational systems:

- Microsoft® Windows Server 2003
- Microsoft® Windows Server 2003 R2
- Microsoft® Windows Server 2008
- Microsoft® Windows Server 2008 R2
- Microsoft® Small Business Server 2003
- Microsoft® Small Business Server 2003 R2

- Microsoft® Small Business Server 2008
- Microsoft® Small Business Server 2011, Standard edition
- Microsoft® Small Business Server 2011, Essentials
- Microsoft® Windows Server 2012
- Microsoft® Windows Server 2012 Essentials
- Microsoft® Windows Server 2012 R2

SWITCH ON FREEDOM

F-Secure®
