# Veeam Availability Suite

## #1 Backup and Recovery

**Challenge**

Enterprise backup is complex and expensive due to legacy practices, large environments and the ever-growing need to scale.

Veeam® Availability Suite™ pairs the expansive backup and recovery features of Veeam Backup & Replication™ with powerful monitoring, analytics and compliance capabilities. Own, control, back up, recover and monitor all your data anywhere in the hybrid cloud with this enterprise-grade solution that provides:

- Failproof backup for your hybrid cloud ecosystem

- Guaranteed recovery from the pioneer of instant recovery

- Deep analytics with insights and automation deliver error-free operations

✔ **A single platform for all workloads, applications, and data**

✔ **Software-defined, infrastructure-agnostic**

✔ **Instant recovery at-scale**

✔ **Stay safe from ransomware**

## Key capabilities

### Failproof backups

- **Protect everything:** Automatically discover and back up your workloads and data across cloud, virtual, physical and NAS environments.

- **Application and cloud-native:** Built to integrate seamlessly with the native environment.

- **Freedom of choice:** 100% software-defined and hardware–agnostic solutions for ultimate flexibility.
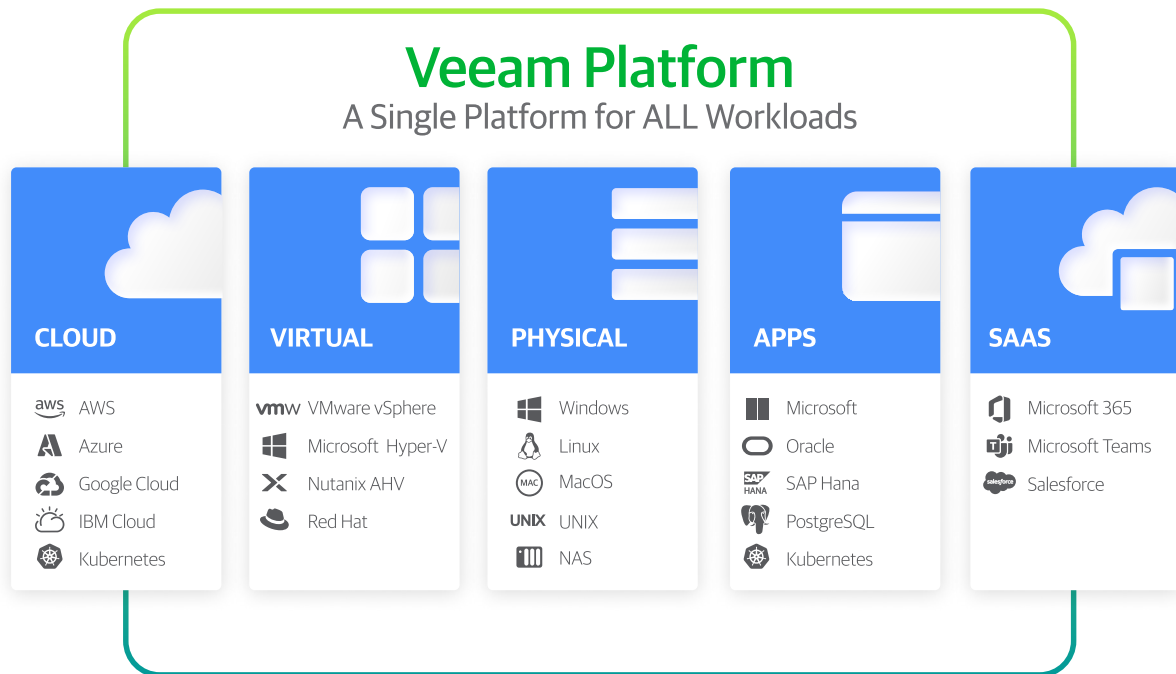

### Guaranteed recovery

- **Instant recovery:** Achieve your service level agreements (SLAs) with reliable restores from the pioneer of instant recovery.

- **Restore anywhere:** Recover across multiple clouds and platforms through portable data formats.

- **Guaranteed recovery:** Automated backup and replica testing ensures recovery in the event of any disaster.

### Cyber resiliency and compliance

- **Data stays safe:** End-to –end backup data immutability from the datacenter to the cloud.

- **Automatic backup scans:** Create malware-free backups thanks to automatic scans with trusted malware detection.

- **Remain compliant:** Avoid compliance failure with end-to-end protection that's tailored to backup data and compliance reporting.

### Monitoring and analytics

- **Proactive alerting:** Mitigate potential issues with 340+ preset alarms before they become threats to your environment.

- **Intelligent diagnostics:** Minimize downtime with proactive issue resolutions to common backup problems.

- **Remediation actions:** Eliminate manual responses to alarms by setting automated, self-healing and policy-based fixes for common problems.

## Protected workloads

## Veeam Platform
### A Single Platform for ALL Workloads

| CLOUD | VIRTUAL | PHYSICAL | APPS | SAAS |
|---|---|---|---|---|
| AWS | VMware vSphere | Windows | Microsoft | Microsoft 365 |
| Azure | Microsoft Hyper-V | Linux | Oracle | Microsoft Teams |
| Google Cloud | Nutanix AHV | MacOS | SAP Hana | Salesforce |
| IBM Cloud | Red Hat | UNIX | PostgreSQL | |
| Kubernetes | | NAS | Kubernetes | |

## 69K+
customers with
1,000 employees

## 400K+
customers worldwide
are protected by Veeam

## 70%
of the Global 2,000
are Veeam Customers

## 81%
of the Fortune 500
are Veeam Customers

"Our IT priorities are simplification, centralization, cloud migration, cost reduction and optimization. We looked for a backup solution that would match our priorities and offer scalability, license portability and hardware and storage neutrality. We didn't have to look far because Veeam set the gold standard."

— **Frank Buiskool,** Canon Europe, Hosting and Cloud Operations Manager
