VEEAM DATA PLATFORM — RECOVERY ORCHESTRATION

Veeam Recovery Orchestrator

Increase business resilience and meet compliance in less time

Challenge

Disaster recovery (DR) demands on security and compliance teams increase the need for a DR plan that can get you back online quickly after an attack.

Veeam® Recovery Orchestrator reduces compliance risk and saves valuable time by automating recovery processes. From mission-critical workloads with near-zero recovery point objectives (RPOs) to the applications that have been neglected due to a lack of planning resources, Veeam provides a powerful, easy to use solution for business resiliency including:

- Dynamically generated DR plans that can prove compliance
- Fully automated DR tests that confirm your recovery objectives can be met
- One-click recovery to keep operations running smoothly

✓ **Impact-free DR testing**

✓ **Document and prove actual recovery objectives**

✓ **Meet compliance goals with automated testing**

✓ **Self-service recovery for application owners**

Key capabilities

Dynamic documentation

- **Save time:** Automatically generate and maintain DR documentation to prove readiness and compliance
- **Be prepared:** Easily build comprehensive DR plans for applications and sites that are automatically updated and verified
- **Show proof:** Your recovery plan is your ticket to fast, planned recovery and compliance when disaster strikes

Compliance

- **Comply:** Ensure your critical compliance and audit requirements are met with testing that provides proof of you meeting your recovery objectives
- **Empower:** Delegate and control secure access for critical application owners and operations teams with secure role-based access control

Automated testing

- **Remove uncertainty:** Recover with automated testing that ensures you can meet your enterprise recovery goals
- **Test:** Perform zero-impact scheduled or on-demand DR tests to ensure required recovery time objectives (RTOs) and RPOs can be met
- **Confirm:** Verify that critical enterprise applications are functioning as expected after recovery

One-click recovery

- **Get back to business:** Securely recover single applications or an entire site in a single click from any location
- **Easy to use:** An intuitive, wizard–driven and web-based interface establishes recovery control and confidence
