

GS1200-5HP/GS1200-8HP

5-Port/8-Port Web Managed PoE Gigabit Switch

The Zyxel GS1200-5HP/GS1200-8HP Web Managed PoE Gigabit Switch is more than just a typical PoE switch. It comes with an easy-to-use Web configuration to prioritize, limit and/or protect network traffics. It has been designed specifically for customers who require simple control functions for office network management.

The simple control functions include dividing a network into one or more smaller groups for security and resource planning. The Zyxel GS1200-5HP/ GS1200-8HPs' configurable QoS feature also enables better traffic management.

The Zyxel GS1200-5HP/GS1200-8HP optimizes media traffic delivery by supporting IGMP Snooping v1/v2 and v3 which is compatible with configurable IGMP router port selection.

The Zyxel GS1200-5HP/GS1200-8HP is firmware-upgradable for better support, and configuration can be backed up and restored to the system as well.

Benefits

Smart features

The Zyxel GS1200-5HP/GS1200-8HP Web Managed PoE Gigabit Switch provides simple control for better manageability. Unlike other advanced but complex managed switches, the Zyxel GS1200-5HP/GS1200-8HP is suitable for most users and provides an affordable solution with fundamental features including PoE, VLAN, QoS, IGMP snooping v1/v2 and v3 compatibility.

Easy configuration

The Zyxel GS1200-5HP/GS1200-8HP does not require any additional software. It is more visualized with an easy, friendly and intuitive Web GUI that helps configuration tasks to be completed in just simple clicks. It is much easier for small office users' network.

PoE support

The Zyxel GS1200-5HP and GS1200-8HP deliver PoE capabilities of IEEE 802.3at (30 watts/per port with total PoE power budget 60 watts) to supply power to PoE-

capable network devices such as wireless APs, IP cameras and IP phones. Web GUI management enables you to monitor power status of each port and/or to reboot the network devices.

Energy saving for IEEE 802.3az

The Zyxel GS1200-5HP/GS1200-8HP built-in IEEE 802.3az Energy Efficient Ethernet (EEE) function automatically detects network traffics and adjusts power consumptions dynamically to reduce power consumption during the low link utilization periods.
